Amendments

Please amend the above-identified application, as follows:

In the Specification:

Page 23, line 18, please delete "give" and insert --given--.

In the Claims:

Please add the following new claims:

--32. (NEW) The method of claim 1, wherein said determining is based upon one or more attributes of said calling program.--

--33. (NEW) The method of claim 1, further comprising performing said determining and said selecting for a caller program and a calling program having similar machine context organizations.--

--34. (NEW) The method of claim 1, wherein said plurality of savearea layouts coexist within a single executable module, and wherein at least one savearea layout of said plurality of savearea layouts is usable when said calling program and said callee program have different machine context organizations and wherein at least one other savearea layout of said plurality of savearea layouts is usable when a calling program and a callee program have similar machine context organizations.--

--35. (NEW) The system of claim 11, wherein said means for determining comprises using one or more attributes of said calling program.--

--36. (NEW) The system of claim 11, further comprising
means for performing said determining and said selecting for a
caller program and a calling program having similar machine
context organizations.--

--37. (NEW) The system of claim 11, wherein said plurality
of savearea layouts coexist within a single executable module,
and wherein at least one savearea layout of said plurality of
savearea layouts is usable when said calling program and said
callee program have different machine context organizations and
wherein at least one other savearea layout of said plurality of
savearea layouts is usable when a calling program and a callee
program have similar machine context organizations.--

--38. (NEW) The at least one program storage device of
claim 22, wherein said determining is based upon one or more
attributes of said calling program.--

--39. (NEW) The at least one program storage device of
claim 22, wherein said method further comprises performing said
determining and said selecting for a caller program and a calling
program having similar machine context organizations.--

--40. (NEW) The at least one program storage device of
claim 22, wherein said plurality of savearea layouts coexist
within a single executable module, and wherein at least one
savearea layout of said plurality of savearea layouts is usable
when said calling program and said callee program have different
machine context organizations and wherein at least one other
savearea layout of said plurality of savearea layouts is usable
